WEB DEVELOPMENT
DIPLOMA PROGRAM

Program Overview

Our Web Development Diploma Program will teach you the essentials to successfully build and develop highly functional websites. Students will be introduced to coding by learning the basics of HTML/CSS, Javascript, Python and so much more.

Students will build your new skills through regular exercises, one-on-one mentorship, and beautiful course projects designed to solidify your skills
Work-Study Program

The main purpose of our Web Development Work Study Program is to provide students with an opportunity to define and analyze a problem, present their analytical findings and develop solutions. This opportunity enables students to develop and refine their professional skills and experience.

Integrating and extending professional practice knowledge and skills gained in the program, students will develop a critical understanding of their personal and professional strengths and limitations. Students must expect some changes to their initial plans. There will invariably be challenges along the way, and they must be flexible and adaptable.

Careers related to Web Development:

- Digital Marketing Manager
